1. What corrections did you have to make?
   a. I had to add the english language to the html document and add labels to the go backwards, play, and fast forwards buttons.
2. Do you think your website is usable if you turn off the CSS? Why or why not?
   a. No, the website will not be usable and accessible because there is no contrast between the artists cards, header and the navigation.
3. Is your site tabbable? In other words, without the use of the mouse, are all the links and buttons accessible using the tab key?
   a. Yes, without the use of the mouse, the links and buttons are accessible with the tab key.
